Place	- Uppatassanti Pagoda, Royal white Elephant Garden

## Characteristics of White Elephant

According to the learned persons of the past successive eras, the characteristics of the white Elephant are the pearl eyes, the white toe-nails, the back which hangs down like the bough of a banana tree, the white hairs on the body and tail, and the tah gah paik (closed door) shaped tail. Its ears are larger than those of ordinary elephants.

Throughout history, white elephants emerged during the time of Myanmar kings and governments who ruled the ten kingly duties.

According to the records compiled by the learned persons, it is said that the white elephant brings peace, stability and prosperity to the nation; (that it prevents all hazards and dangers and that the nation) enjoys annual bumper food harvests and is rich when the white elephant emerges.

Emergence of the white elephants is a good omen for the nation at a time when the state is endeavouring to build a peaceful, modern and developed nation. It is assumed that the nation will be peaceful, prosperous and totally free from all the dangers because of the white elephants.
